

Earned Value Management Institute®, EVM I®'s groundbreaking and innovative programs are for those who heed the call to winning, succeeding, dominance and distinction through improving their existing business processes; connecting the problem-solving dots; proactively managing risks; eliminating cost overruns and schedule delays on their projects; and holding oneself and organization accountable to achieving excellent and high quality products, services delivery and results will find EVM I® to be the right place. Unique rewards such as increased profitability, higher returns on investment (ROI), sustained business growth through better project management; increased competition and improved strategic advantage awaits you upon completion of EVM I® programs. EVM I® program participants can expect a carefully structured and integrated blend of high-impact lectures, presentations, small group discussions, inspirational teaching, and the hallmark EVM I® case-study model. The **EVM I® Advantage™ and the EVM I® Experience™** is illuminated:

EVM I® Teaching Faculty: World-Class

All EVM I® courses are taught by full-time, dedicated and committed faculty from EVM I®. EVM I® instructors are globally renowned and fully committed to teaching project controls, project management and earned value management (EVM). EVM I® faculty contributes immensely and significantly in their respective research areas of expertise and interest. Our instructors draw upon their wisdom that has been gained from applied practical and real life work experiences rather than from just theoretical models. **All EVM I®'s Earned Value Management Instructors:**

- (a) Have a Master of Science (MS) Degree in Project Management and A Second Master of Science (MS) Degree in Engineering (Electrical, Civil, Computer, Mechanical, Aeronautical, Software), Computer Science Or Information Technology;
- (b) Are Earned Value Management Institute®, EVM I® Earned Value Management Professional® EVMP® certified;
- (c) Have over Fifteen Years of Earned Value Management (EVM), Project Controls and Project Management Experience in Industry or Government or Both;
- (d) Have implemented several compliant EIA-ANSI 748 Earned Value Management Systems (EVMS) on very large, complex and high dollar, multimillion/multibillion valued, programs and projects;
- (e) Have taught in Graduate Programs at Accredited Universities in USA and abroad

Leadership Skills Building & Competencies Are Developed:

All our Earned Value Management (EVM) credential training programs focus and build leadership competencies and project problem solving skills required to steer projects and programs onto the right course. Models, project management techniques and concepts that prevent cost overruns, schedule delays and poor quality deliverables, are employed across our globally recognized credential and certification programs:

- **CAEVM™ Certified Associate in Earned Value Management™**
- **EVMP® Earned Value Management Professional®**
- **CEVO® Chief Earned Value Officer®**

Practical Insights Gained From EVMI® Business Case Method:

One of the many distinctive features of training at EVMI® is the use of business case studies. This active and proactive learning method among many others, teaches the participant to analyze, study, respond and act to complex project issues. These real life case study methods develops problem solving skills, provokes thought, develops critical thinking and assesses the leadership potential within each program participant.

EVMI® Global Curriculum:

Our globally interconnected economy requires astute project leadership to communicate and share project information in real time across time zones and national boundaries; and across diverse teams that reflect many cultures and viewpoints. Our program materials highlight and specifically address some of the global changes and challenges that impact projects and programs.

Diverse Participant Mix Enriches Classroom Experience:

EVMI® program participants come from diverse backgrounds, companies and organizations. This unique blend and vibrant mix of participants from different functions, industries, countries and international organizations enriches the classroom experience. Many EVMI® program participants build networks and connections; friendships and collaborations that span decades and lifetimes. A recent typical EVMP® credential certification class included a space engineer, bio-medical researcher, Senior Telecommunications Analyst, international development expert, corporate vice president, a lawyer, CPA accountant, senior program manager, General Electric Senior Project Manager, and United States Navy Commanding Officer.
